ABSTRACT

This compilation of charts and tables provides a statistical profile of the three campuses of John C. Calhoun State Community College, including 1988 data and figures from previous years where appropriate. Student data cover enrollments by full-/part-time status, program, gender, geographical source, residence, ethnicity, age, and campus. In addition, information is provided on graduates by division and campus and on financial aid awards. Charts showing the characteristics of full-time teaching faculty by campus are followed by a table showing the positions occupied by full-time personnel at Calhoun Community College. Information on revenues and expenditures and on external funding is followed by statewide data on fall headcount for all junior and technical colleges in Alabama. The final tables deal with training for business and industry, and companies employing five or more Calhoun students and/or members of their families. (AJL)
